

SCREEN SYSTEMS BOULEVARD

SHEPHERDS SCREEN SYSTEMS • DESIGN • SUPPLY • INSTALL

1800mm high panel, with glass and fabric, fitted with a centre raceway panel.

1200mm high panel, with glass and fabric, fitted with a centre raceway panel.

Boulevard can be supplied with a soft wiring electrical system. Note that each power point can be individually turned on, with "Power On" L.E.D. light.

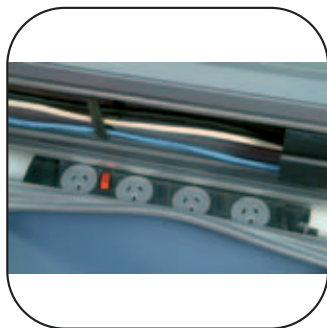

Standard Two Person

- Desk height power and data provision
- Fewer parts than other screen systems
- Aluminium construction
- Simple storage for power, communication and data lines which allow easy access and relocation

Boulevard GPO's can be either 2 or 4, and they can also be joined as required.

This system is designed to be a solution orientated system that offers exceptional value with quality features.

Centre raceway panel, fitted with a 4 x gang GPO, and cables. The GPO can be accessed by either side of the panel.

The unique centre raceway amply holds all cables and power points for users on either side.

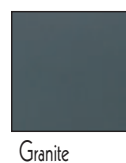

By utilising a designed rubberised skirt, users can easily access the required services by lifting the exterior plastic panel. No unsightly external data or power points, and the ability to relocate items at the user's discretion.

Raceway illustrating cable holding capacity.
